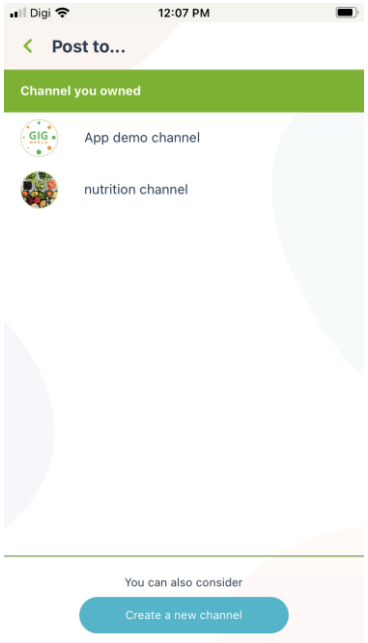
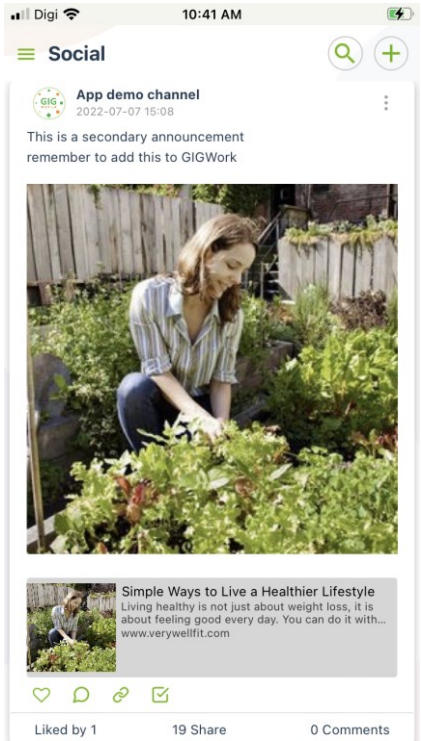
- Lead Contacts list
- Resource Tool
- Todo List

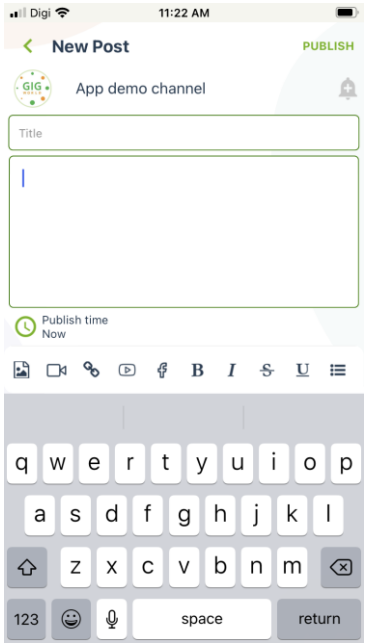
Social Community Module

Build your company own community with channel and post feature

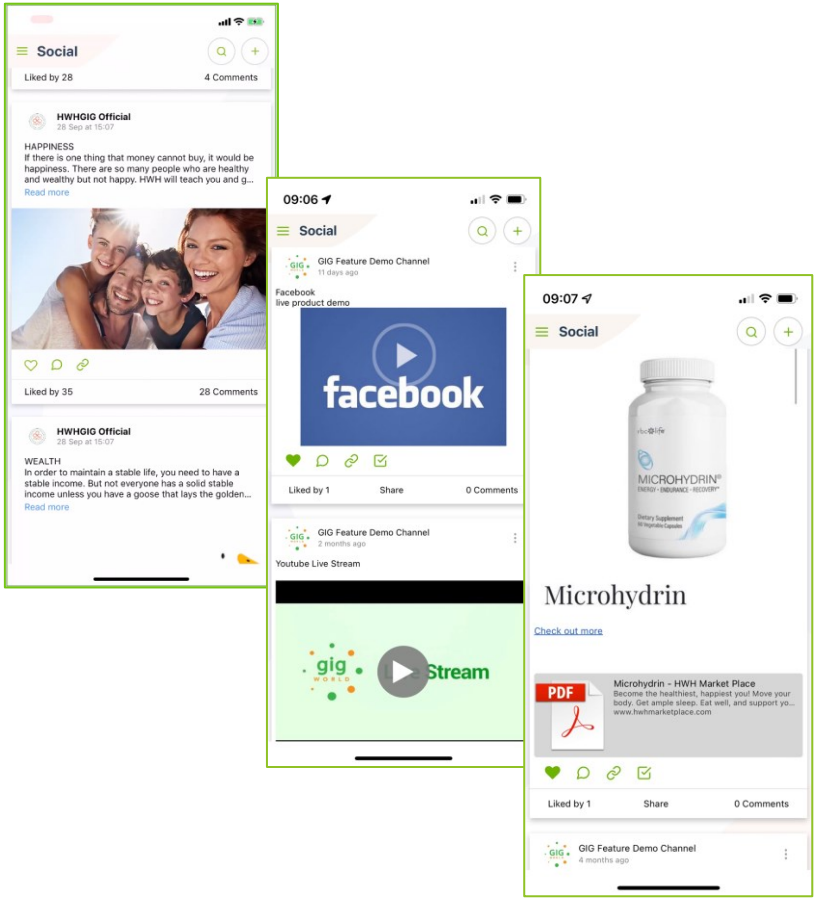


Create multiple channel for different topic





Post different content in channel for attract consumer attention



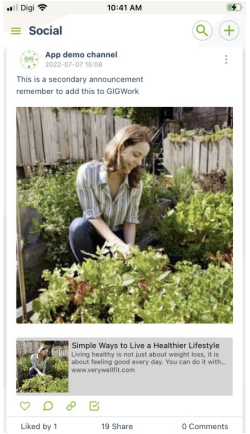
Amplifying the power of your content in different formats

Brands can now create their content and have their distributors, affiliates, referral partners or network marketers share their content to generate sales.

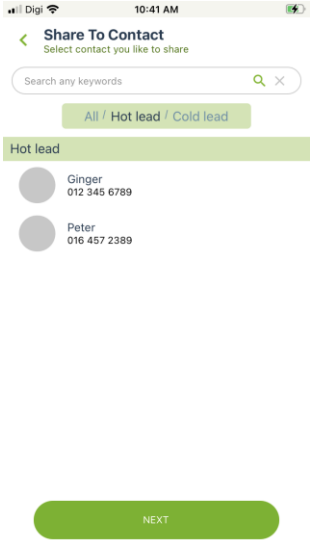
Your content can be in many formats.

Text,
Images,
Videos,
URLs for survey, document or website,
Youtube Live or Facebook Live.

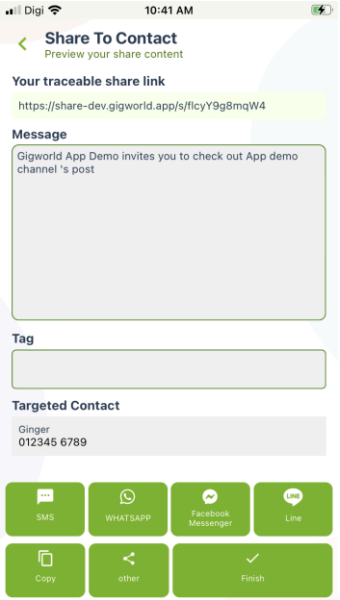
Select post



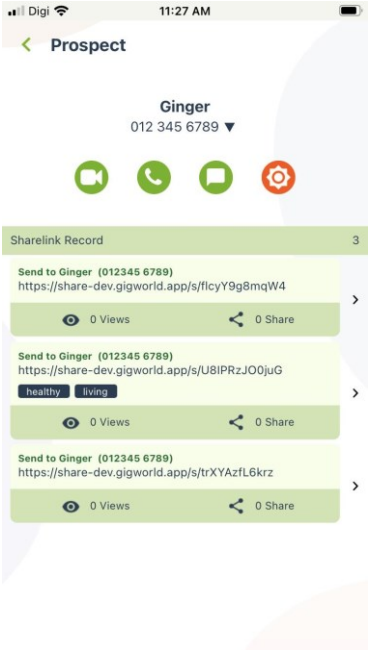
Select lead



Share the sharelink

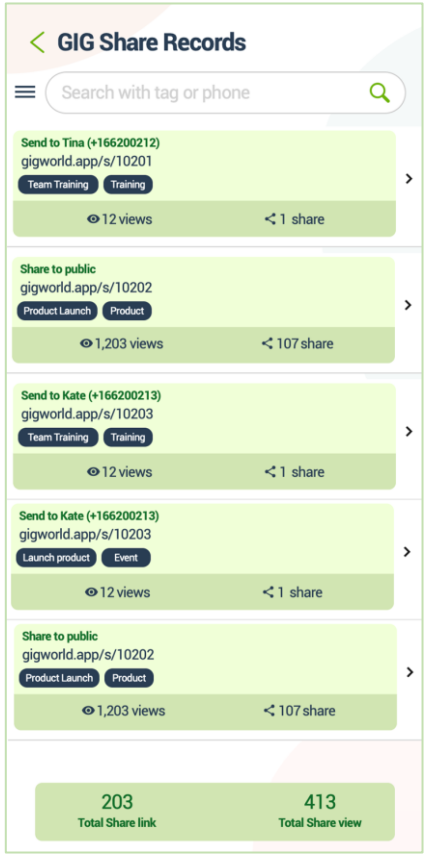


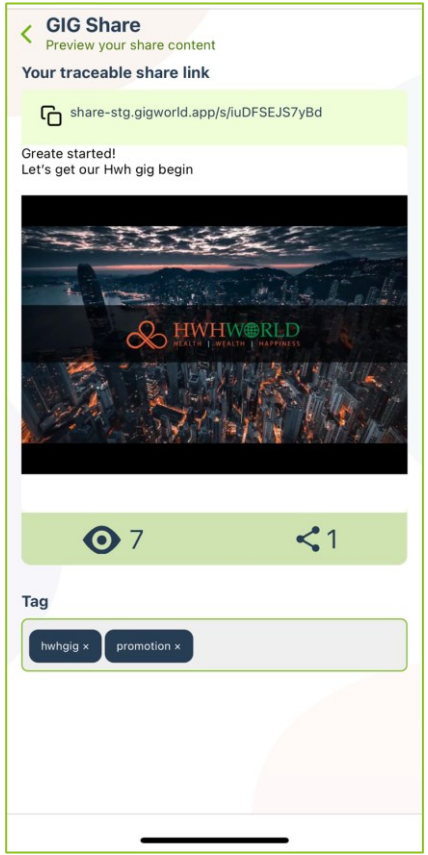
Track the link record



Engage with leads through Channels and Sharelinks

- Share content with traceable URLs
- Track engagement to optimize content
- Targeted sharing to specific leads
- Notifications for tracking who has opened links and when





Measuring Effectiveness

Members can now measure the metrics of their networks and the content they shared.

Some of the metrics are unique and total views and link clicks, click through rate, time on web page, location, referrer and device charts.

More metrics, in the form of graphs and charts will be added in the future.
